| Project Name | Enforcing Mandatory Fields Using UI Policies and Migrating Changes with Update Sets |
| Maximum Marks | 4 Marks |

## Solution Architecture:

Solution architecture connects business problems with technical solutions. In this project, ServiceNow is used to ensure data accuracy and proper change management.

## Goals:

● **Find best solution:**
Use **UI Policies** to make important fields mandatory and avoid incomplete data.

● **Describe system:**
Forms, UI Policies, and Update Sets work together to control field behavior and track changes.

● **Define features:**
Mandatory fields, real-time validation, and safe migration using Update Sets.

● **Provide specifications:**
Configure UI Policies correctly and use Update Sets to move changes between instances without errors.

## Example - Solution Architecture Diagram:
